

New Millennium Inc.
Forex and Commodity Trading Services

Limited Edition Black Label Package

[the latest edition of this package document is always available here](#)

a freedom action pack by:
Adam Liddiard
Trading Director, New Millennium inc.

introduction

Perhaps you already know the advantages of building your wealth inside an **offshore corporate structure**, but you need something to build that structure around before you can truly launch your own offshore **passive income stream**? Or, you've already understood the tremendous wealth generating opportunities offered by **managed broker accounts**, but need to know how to correctly structure them offshore to get the **maximum benefit for yourself**? Or perhaps you don't know any of this yet, but you don't want to pass up the opportunity to be shown exactly how to build a complete **passive income stream from scratch**? If any of these describe you, then this [Freedom Action Pack](#) is precisely what you've been looking for.

So, what exactly *is* it that you have here?

- In the first instance, you have a one-stop **easy reference** for all the contacts you'll need at each stage of the process. It's almost as if you had direct access to my rolodex, and a **selection of the best contacts** I've painstakingly built up over the years.
- Not only that, if you want it, you'll have me as your **personal mentor** to guide you through every step, and keep everything moving forward for you. Or if you'd prefer, you can deal direct with my suppliers. However, due the **very high-level of personalized service** you will receive if you deal with me, I have space available for **only five clients at a time**.

Without the information in this [Freedom Action Pack](#), it would otherwise be up to you to find a trustworthy and proven

offshore services provider, and the best **broker** for your accounts, and the right **account manager** for your investments. At a bare minimum you're already dealing with at least *three* separate service providers, and if you've set things up correctly they're almost certainly scattered across the globe. If that sounds daunting, it's because it is! It took me, quite literally, years of expensive trial-and-error to find the **right people** and to learn how to use them together to build an **offshore corporate passive income stream**. I've already made all the mistakes so you don't have to, and the information that you have right here is the culmination of my many **years of hard won experience**. I've already made the path over those years that I've dedicated to the pursuit of passive and sustainable income, and with this [Freedom Action Pack](#) I'm going to lead you along the path I've beaten.

In the pages ahead, you'll find out exactly who you have to speak to, and what you need to ask for at every stage while you build your very own **offshore corporate passive income stream**. And, beyond that you have my personal undertaking to assist you right from the start and through to the very end of the process. And, as if that wasn't more than enough in its own right, you'll also have **everything that NMI offers**: including (but not limited to!) our **brand new trading-software** systems; and a **fixed-for-life performance-fee** schedule on your managed accounts.

If there's a catch, then it's that as everything comes into place, you must undertake to deposit a combined minimum of **US\$10,000 (or equivalent)** into **your accounts** to capitalize **your business**.

Yours in prosperity,

Adam Liddiard

Contents

- ◎ **1. The Corporate Offshore Structure and Bank Account** **2**
 - ▶ *Full contact details and website of a reliable and proven provider of offshore services, along with appropriate web pages relating to structuring options, and a referral from **NMi**.*

- ◎ **2. The Corporate Brokerage Account/s** **4**

- ◎ **3. The Corporate Revenue Generating Business** **6**
 - ▶ *Managed Robot-Assisted Trading Systems:
A selection of managed trading accounts to choose from with details of how to set them up to grow the capital in your brokerage account.*

 - ▶ *Self-Managed Automated Trading Systems:
Or, you can deploy your own automated trading-system to manage your brokerage capital using proven expert advisor software.*

- ◎ **4. Package Overview and Pricing** **13**
 - ▶ *A complete overview of the special Sovereign Life member pricing-structure and of a complete package deal, available only through **NMi**.*

I. The Corporate Offshore Structure and Bank Account

Your corporate structure is the backbone upon which everything else is built. **NMi** recommends the **Seychelles** jurisdiction for **incorporation of your International Business Corporation**. We believe it to be one of the very best for numerous reasons, not the least among which is that it houses a private branch of the prestigious **Barclays Bank**. When you combine this with a top-tier offshore corporate services provider, you are on to an obvious winner. Our preferred offshore services provider is directed by a former **Australian corporate lawyer**, now relocated to the Seychelles. His firm provides service that is nothing short of outstanding, and that is why **NMi** continues to work in close tandem with them.

If you move quickly enough to take advantage of my personal mentorship, then I'll act as your **personal intermediary** with *Professional Offshore Companies*.

And if not, then I'll still provide you with a referral to *Patrick Flynn*, **Managing Director at Professional Offshore**; and a qualified lawyer with a legal career spanning more than two decades. When you talk to Patrick, you'll find him to be incredibly down-to-earth, friendly, and above all an easy to deal with "can do" fellow.

IBC and Bank Account Packages: [details](#)

This is what you will get when you use Professional Offshore Companies for your **International Business Corporation**:

- Nominee Company Director
- Nominee Company Secretary
- Nominee Shareholder
- Maintenance of share registers
- Maintenance of asset registers
- Mail receiving and forwarding
- Fax receiving and forwarding
- Registered Office Service
- Registered Agent Service
- Annual Government Fee
- Incorporation Fee
- Certificate of Incorporation
- Memorandum and Articles of Association
- Directors Appointment Resolution
- First Director's meeting minute
- Share Certificate
- Certified True Copy of all Documents
- Courier delivery fee
- Safe custody of company books
- Set up and first year's admin

With this **Freedom Action Pack** you'll receive 12 months of **on-call consultancy** service direct from *Professional Offshore*! **You can phone or email at any time** during the course of the first year after your incorporation for advice on how to use your IBC effectively.

Before you incorporate your IBC, you'll need to **provide ID and PoA** (proof of address), as well as fill in some straight-forward legal documents, after which your IBC will be fully

incorporated **within 24 hours of receipt of payment.**

Soon after that you'll receive your **Corporate Bank Account** applications from Barclays along with *examples of partially completed application forms*, which makes filling the forms in **as easy as it can possibly be** for you. After your Corporate Barclays bank account is approved and opened, you can **apply for internet banking** facilities too.

To get the ball rolling, you must simply choose your company's name: Upon receipt of payment your IBC will be incorporated, and all documents immediately scanned and emailed to you so that you can begin the process of opening a corporate brokerage account right away. And then, within a week you will **receive hard copies of everything** by express international courier.

eMarkets liquidity provider
B2C and B2B solutions

FSA Regulated

FSA Register number
448002

Are your funds safe?

Alpari UK provides a
high level of protection

2. The Corporate Brokerage Account/s

Since this is the heart of your money-making engine, we've selected a **top-notch, secure and service-orientated broker**. *Alpari (UK)* is **fully regulated** by the UK Financial Services Authority. Importantly for you, this brokerage has plenty of **experience with IBC account holders** and is not troubled by opening corporate accounts of this nature. *Alpari (UK)* also employs **FSA regulated segregated accounts**, which ensures the **financial security** of any unused margin – usually the majority of your funds – so the broker actually *never* has direct control of your trading capital. If you are sensible, then this should be a **prerequisite for any broker** you invest with, so that in the unlikely event that the brokerage becomes insolvent for some reason, your funds are not left vulnerable. All together, these characteristics make accounts with *Alpari (UK)* ideally suited for **NMi** trading systems.

To open your brokerage account at *Alpari (UK)*, [click here](#), and be very careful to select the **micro account type** and the **500:1 leverage** option.

1 Select your account

2 Read these documents

3 Tell us about yourself

4 Submit the supporting documents

5 Deposit funds and start trading

In order to complete the process of opening your first corporate brokerage account, you'll need to provide *Alpari (UK)* with your **ID and PoA** much like before and also fill in some additional documents. **IBC owned accounts** with *Alpari (UK)* also require **scanned and certified copies of all your corporate documents**. If you need assistance at any point, the client service at *Alpari (UK)* is very helpful, but I'll also assist you in any way necessary if you've acted quickly enough to **take my personal mentoring**.

If you require **additional accounts** to host a selection of trading-systems or managed accounts, you will be able to **request those** as soon as you receive the first account confirmation from *Alpari (UK)*.

email: info@alpari.co.uk
website: <http://www.alpari.co.uk>
new accounts phone:
+44 (0)20 7426-2900

For each additional account you'll need to sign and scan at least the following documents, which *Alpari (UK)* will provide you with:

- New Additional Account request
- Internal account transfer
- [Limited Power of Attorney](#)
- [Limited Power of Attorney Addendum](#)
- [Money Management Commission Disclosure](#)
- Withdrawal request

The **funding for the additional accounts**, as with the original brokerage account, **must always be transferred from your corporate IBC** bank account, and any funds you withdraw from the brokerage account must similarly be transferred back into your corporate IBC bank account. Brokerage accounts can be maintained in any one of a range of currencies (**CHF, GBP, EUR, JPY, USD**) regardless of which account type you have selected.

Critically, through your IBC, you are in **absolute and complete control** of all the deposits and withdrawals made to your corporate brokerage accounts. You will receive **daily statements in your email**, and have the option to use some **free software** to view each account in live-time while it is trading (this software is called "[MetaTrader4](#)", and is extremely well tested and used very widely). And, of course, it should go without saying that subject to open trades and account equity, you have **daily liquidity to withdraw and deposit** funds with your brokerage accounts as and when you please.

3. The Corporate Revenue Generating Business

Now that you have your structures in place, you'll need some means to grow your initial deposits into a **sustainable passive income stream**. With this [Freedom Action Pack](#) you will get access to a selection of **reliable long-term** managed Forex accounts from **NMi**. This is a combination of advisor software and trading-systems from *New Millennium inc.* that you **can either choose to do-it-yourself**, or employ within fully **managed accounts**.

The do-it-yourself options come with **full back-up**, and the managed accounts option come with a complete suite of support and reporting tools, **unequaled by any other provider** we know.

Whether or not you were fast enough to take the option of my mentorship for the entire process... at this stage I'll be in direct communication with you regardless. In addition to my **personal support**, you'll also have the backup of your very own **power-team**:

- **Emmanuel Gob** will be your technical guru, and advisor for all things related to your trading software;
- and **Gary V. Vaughan** will act as your internet wizard and process trouble shooter.

Along with each managed account **NMi** will provide you with live account reporting, the monthly details linked to in the next section are just one part of a comprehensive live feed that forms a part of your managed account package. In order to sign up for these managed accounts, you'll need to complete, scan and return to newaccounts@alpariuk.com the following documents:

- [LPoA](#) (only for **NMi** Guardian MA)
- [LPoA Addendum](#)
- [MM Commission Disclosure](#)

New Millennium inc. Automated self-trading software

This is a selection of the same software that we use to guide the trades made on NMI accounts:

- [NMI EA](#)
the original proprietary NMI grid trading robotic assistant, which I personally designed and is available to you as part of this [Freedom Action Pack](#);
- [NMI Gold Rush](#)
our original self-trade long-only gold system (which also has options for trading silver and oil)

Forex Trading Services - In House

As a purchaser of this **Limited Edition Black Label** package, I will personally trade any or all of the following **NMi managed accounts** for you. I am in a perpetual state of research, evaluation and development of existing and new trading systems based on the prevailing market conditions to ensure that you have an excellent selection of accounts utilizing the best available trading methods among which to spread your risk. The following accounts represent the stable of managed accounts currently offered by **NMi**.

Should you decide to incorporate one or more of the following into your managed account portfolio, I'll ensure they are all set up for you as soon as you've made your selection.

NMi Managed FX Guardian Accounts

Our flagship manually traded **NMi** managed **Guardian** account also has some assistance from trading robots. This account has evolved to include a short- to medium-term position-trading system in addition to using short-term technical based trades. Strict risk control is exercised with trades placed only when a prime opportunity presents itself, and it is a primary objective that these accounts are brought back flat to the market as regularly as possible.

The trading methodology for this account has recently been improved and new components have been included to employ a more diverse approach. As such official results will be posted to [our website](#) commencing after the end of the August 2010.

Self Managed Gold Rush Accounts

The original **NMi Gold Rush System**, released in 2008, is a [fundamentals](#) based system developed to enable anyone to employ a simple buy-only leveraged gold-trading system. Every aspect of installing and maintaining the system is explained in plain English, and can be implemented on a demo account in around an hour, with another few minutes every month to maintain it. The system is based on a very easy to understand mathematical formula, with results amplified by the leverage gained through the use of a brokerage account to trade the gold market rather than dealing with physical gold.

NMi Managed auto-traded Gold Rush Accounts

Optionally, Black Label clients can elect to have **NMi** manage this system with an auto-trade EA set up to trade the **Gold Rush System** (or even a variation) according to our standard terms, so you don't even need to maintain your account manually. And we can make special arrangements for you to execute this same system in the **silver market** with settings according to your particular risk tolerance.

If you decide to take advantage of this offer, then I'll need you to contact me to discuss the various options that are available, in order to determine exactly what will work best for you.

[Self Managed Gold Rush Accounts](#) (backtest data)

Cumulative Performance: +159.54% (since January 2008)

Average Monthly ROI: 3.51% (since January 2008)

If you had owned **physical gold** during the same period, the spot price went from **\$923 to \$1169**, a cumulative performance of just **+40%**, barely a quarter of what you would have earned with an NMi Gold Rush Account.

For the period covered by this graph, 2 years and 4 months ending in April 2010, the cumulative performance of the spot price of gold was just 40%. Since then the gold market has picked up a lot more steam, closing out 2010 at over **\$1420**, representing a **further +20%** gain in the spot market in the following 8 months alone. It goes without saying that as the spot price of gold continues to rise, this Gold Rush system would have and will continue to leverage and multiply your **ROI** impressively compared to buying and holding physical gold over the same period.

■ % Monthly ROI
■ % Compound Growth

[NMI Managed Guardian Accounts \(STD leverage\)](#)

Cumulative Performance: +103.64% (since 12 March 2010)
Average Monthly ROI: 8.11% (since 12 March 2010)

Trading at NMI commenced from **16 Aug** at **0.5% of balance risked** per trade, moving up to **1.5% maximum risk**. Prior months reflect trader's earlier records at 1.5% risk per trade.

■ % Monthly ROI
 ■ % Compound Growth

[NMI Managed Guardian Accounts \(2X leverage\)](#)

Cumulative Performance: +269.5% (since 12 March 2010)
Average Monthly ROI: 9.71% (since 12 March 2010)

Trading at NMI commenced from **1 Oct** at **3% of balance risked** per trade. Prior months reflect trader's earlier records extrapolated to 3.0% risk per trade.

Forex Trading Services - via introduction

In addition to the **managed accounts** I'll be trading for you personally at **NMi**; as an additional bonus for purchasers of this **Limited Edition Black Label** package, I will also provide referrals to some **additional managed account services** as offered by **three separate traders** from my rolodex. I've become privy to these contacts with thanks to some fellow Forex veterans whom I've known for about as long as I've been involved in Forex myself: I hold their judgement in **extremely high regard**. All of the following accounts target **very high growth**, so you'll find them suitable if you are an **aggressive investor**.

If you elect to make one or more of the following part of your managed account portfolio, at this stage I'll arrange to have them set up for you as soon as you've made your choices.

McLaren FX Managed Accounts

McLaren FX is a conservative & robust single-method trend follower. Designed to provide **consistent monthly gains** with a relatively **low intra-month drawdown**, it is "comfortable" for most investors. It doesn't trade every day, but carefully closes any pending orders on non-trading days, and doesn't usually carry trades over the weekend either. Major changes in trend direction or strength and unusually large or small price movement will also prevent trading. Without exception, only trades with **better than 1:1 risk/reward** ratio are taken, and always with the view to trail winners while employing **risk minimizing strategies** such as moving stops to break even.

Precision FX Managed Accounts

The work-horse producing the results behind the **Precision FX system** is a complex EA (*Expert Advisor*), designed by one of the sharpest minds in the industry in my opinion. It maintains aggressive profit targets, along with manageable drawdowns. The system has been trading live using this newest strategy since *May 1st, 2009*.

Chrome FX Managed Accounts

Chrome FX is a systematic trading-strategy (often manually adjusted by the developer) which has amazed more than just me with its **performance, accuracy**, and its ability to self-adapt to various **market conditions**. The trading style is again **aggressive**, but its simple built-in trade rules combined with its **advanced money management** has presented a frankly **astonishing live track** record to date!

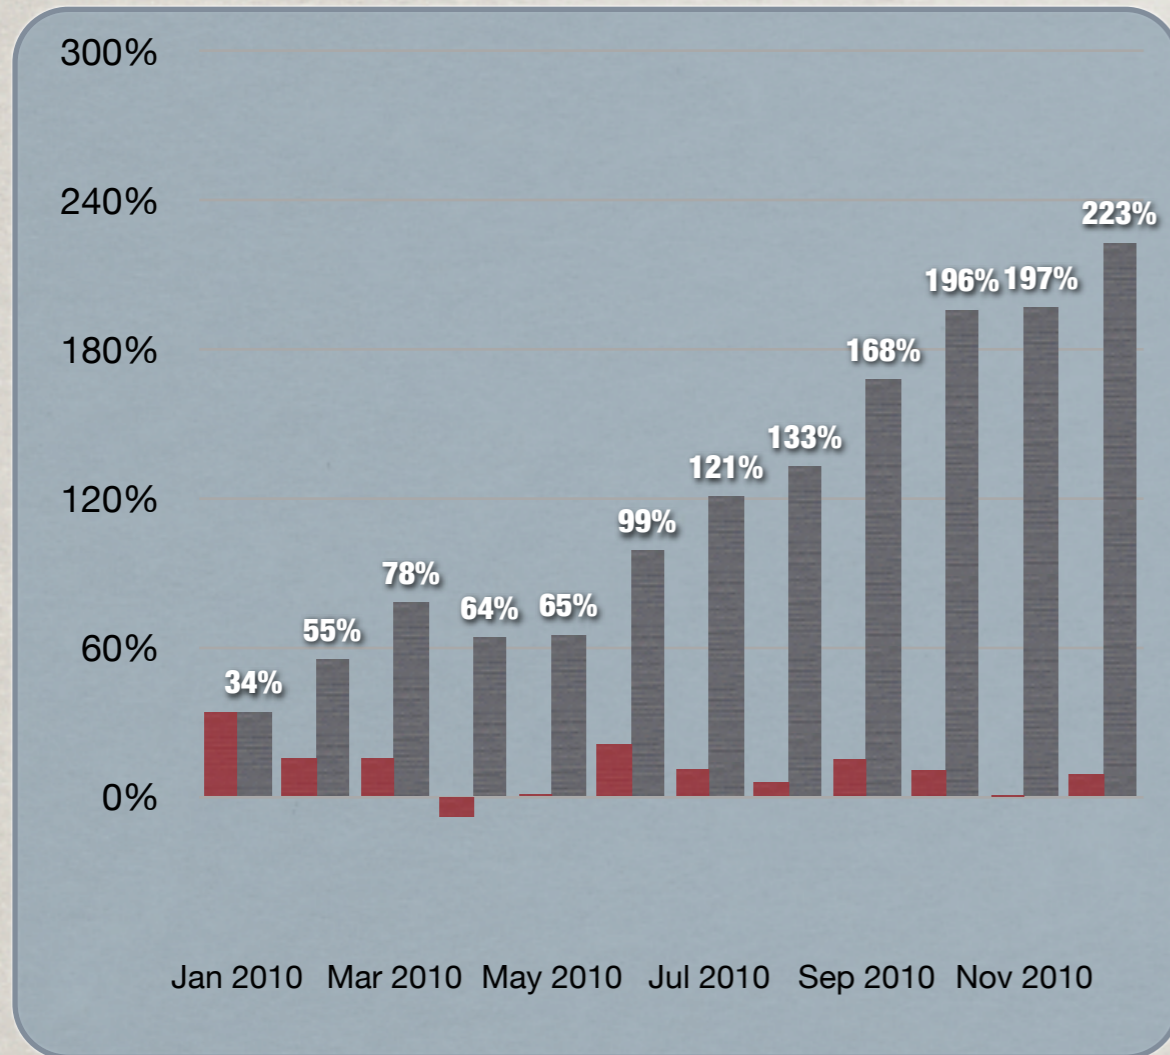

Sparrow FX Managed Accounts

As one of the **safest managed account products** ever developed, **Sparrow FX** come with a **six month guarantee of principle**. *Low drawdown and minimal trades equates to slow and steady profits*. Utilizing **fourteen** proprietary indicators this account seeks only the **very best trades** during **safe trading time** periods. By watching all market sessions this professionally managed EA system constantly adapts itself to market conditions as it trades, gaining consistent year-on-year performance improvements.

website: <http://www.new-millenniuminc.com>

phone: +44 (0)20 3239-4144

[Precision FX Accounts](#) (live audited results)

Cumulative Performance: +223% (last 12 months)
Average Monthly ROI: 10.76% (last 12 months)
 That's **\$1076 every month** for each \$10,000 invested.

[Chrome FX Accounts](#) (live audited results)

Cumulative performance: +55.95% (last 12 months)
Average Monthly ROI: 4.32% (last 12 months)
 That's **\$432 every month** for each \$10,000 invested.

#11

[Sparrow FX Accounts](#) (live audited results)

Cumulative Performance: +80.29% (last 6 months)
Average Monthly ROI: 10.37% (last 6 months)
 That's **\$1037 every month** for each \$10,000 invested.

[McLaren FX Accounts](#) (live audited results)

Cumulative performance: +119.59% (last 12 months)
Average Monthly ROI: 7.1% (last 12 months)
 That's **\$710 every month** for each \$10,000 invested.

4. Package Overview and Pricing

So now that you know exactly what's involved, you're probably interested to know **how much will all of this cost?** If you just skipped to here from the beginning, you really should **at least skim through the earlier pages** to learn just how much value you will get as part of this [Freedom Action Package](#).

In any case, let's recap:

1. There is the **cost of the IBC structure and incorporation** process, which varies **depending on the jurisdiction** you choose, and the **bank account options** you select. These are the prices given in US Dollars on the *Professional Offshore Companies* website, for a **full nominee package**:

| Price | | | | | |
|------------|--------|--------|--------|-----------|----------|
| Seychelles | BVI | Panama | Belize | St. Kitts | Dominica |
| \$1600 | \$1950 | \$1800 | \$1700 | \$1700 | \$1700 |

And for the *Ultimate Package*, which has all of the benefits of a **full nominee package**, plus establishment of a **Swiss bank account**:

| Price | | | | | |
|------------|--------|--------|--------|-----------|----------|
| Seychelles | BVI | Panama | Belize | St. Kitts | Dominica |
| \$1900 | \$2250 | \$2100 | \$2000 | \$2000 | \$2000 |

Within 24 hours of receipt of payment your IBC will be incorporated provided the name is available and shortly thereafter you will receive **bank account opening instructions**.

2. Once your IBC bank account is open, you'll need to **deposit the US\$20,000 or equivalent** in readiness for funding your brokerage account.

Unless there's a specific reason to do otherwise I highly recommend the **Seychelles branch of Barclays bank** for the corporate banking account. The **cost of account introductions and opening is included** in the *Professional Offshore Services* fees, outlined in *step 1* above.

3. Having set up your *IBC*, and used it to open an account, you'll then need to **open a brokerage account** with *Alpari (UK)*. There's **no additional charge** for this either. You'll just need to fund the brokerage accounts from your *IBC's* bank account.
4. With the brokerage accounts open and fully funded you can either elect to **have them run as managed accounts**, or purchase one or more of the recommended software packages from chapter 3 and **run it yourself**. Normally **NMi** charge a nominal \$100 software and setup fee for each managed account, but if you elect to have us manage your accounts or you use our referrals then **these fees will be waived**. We do charge a very low performance fee on managed accounts, which is levied as a **20% profit share on trading gains only**. The other 80% of the profit remains in your trading account. That is, if we don't make a profit for you in any given month, **there is no charge**. And while the account recovers to its previous highest balance, there is **still no charge**, so you get a **discount on the following month** too.

email: info@new-millenniuminc.com

website: <http://www.new-millenniuminc.com>

phone: +44 (0)20 3239-4144

#13

5. If you're quick enough to pick up one of the **very limited** packages with my **personal mentorship**, also including backup from your **personal power-team**, then I normally charge a flat US\$799 one-time fee for this service no matter how much help you need to get through the process. And, *don't you think that if you had on-tap help from someone like me to get you through all the paperwork and introductions, everything will happen much faster and more smoothly saving you a lot of anxiety and time?* If you have any friends and associates who would benefit from this service, and they are lucky enough to secure one of the limited mentoring slots I have available, this small \$799 fee is what I will charge them (unless they [join Sovereign Life](#) themselves, of course). As a **special deal for all Sovereign Life members**, I'll provide **mentoring at no charge**. All you need to do is provide me with your **Sovereign Life account name** so that I can verify with *David McGregor*. Not only that, as a special one-off for *Sovereign Life* members, in addition to the **NMi** business number quoted throughout this [Freedom Action Pack](#), I'll also give you **my personal cell-phone number** when you are accepted into the mentorship programme (in case you need urgent help with anything along the way).

That's it! To secure your place, with or without the limited personal mentoring **at zero initial cost** to you either way, you will need to get in touch with me right away using the *contact details on the previous page*.

The sooner we get you started, the sooner you'll **see your first payment** from your very own **offshore corporate passive income stream**.

Appendix A: Forex Terminology

Fundamentals

Fundamental analysis is based on the premise that gold (and the market as a whole) has an intrinsic value - a function of the gold price with consideration of all underlying variables. The assessment of all these variables combine to produce an anticipated increase or decrease in value, inclusive of an accompanying risk.

See also: *Technicals*.

Hedge

A hedge is a trade taken of equal value but in opposing direction to another currently open position. This serves to offset losses on the first position, which is sometimes desirable if the market is only temporarily moving against a core position.

It is also used in advanced trading techniques designed with hedging as integral component to the system, such is the case with **NMi**'s Pendulum system.

Margin

How many dollars the broker sets aside from your account funds for X amount of order value, according to the leverage you have chosen for your trades. With a 500:1 leverage margin-policy, the broker sets aside \$1 of your account for every \$500 of order value.

For example, one full \$100,000 lot would requires $\$100,000/500 = \200 of margin, equivalent to 0.2% of the value of the lot. So, in theory you can trade with \$100,000 of currency using only a \$250 account, as long as you keep in mind that a 0.2% move against your \$100,000 position will cause you to lose the \$200 set aside as margin by the broker when you entered the trade

Technicals

Technical trading is the study of price and volume behavior in financial markets in order to anticipate their future performance. But, note that the market can go up or down at any time, so it is only the probability of a given market move that varies, so technical trading is **not an exact science**.

It's been said that **fundamentalists** trade on what **should** happen, while the **technicians** trade on what **has** happened. Both methods have pros and cons in their application and it's widely considered prudent to be knowledgeable of both concepts before making any investment decision.

Important note: Risk Disclaimer

Trading in the off-exchange retail Spot Gold and Forex Markets has opportunity for large potential rewards, but also equal opportunity for large potential loss. You must be aware of the risks and be willing to accept them in order to invest in the Spot Gold and Forex Markets. The possibility exists that you could sustain a loss of some or all of your initial investment and therefore you should not invest money that you cannot afford to lose. Nothing in this document, our website, or other materials shall be deemed a solicitation or an offer to buy/sell gold or securities and we are not liable for any loss or damages. No representation is being made that any account will or is likely to achieve profits as past performance of any trading methodology is not indicative of future results.

Hypothetical or simulated performance results have certain limitations. Unlike an actual performance record, simulated results do not represent actual trading. Also, since the trades have not actually been executed, the results may have under or over-compensated for the impact, if any, of certain market factors such as lack of liquidity. Hypothetical trading programs in general are benefit of hindsight. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. Substantial risk is involved.

Unless specified, New Millennium inc. does not charge any additional fees to the client. Our compensation can be in the following form: a rebate from the pip spread paid by the brokerage.

All information provided in this document, on our website, or any other materials we have produced or will produce is the result of reasonable efforts to obtain reliable content from third parties that is believed to be accurate. However, there may be delays, omissions or inaccuracies in such information. New Millennium inc. does not and cannot warrant the accuracy, timeliness, suitability, completeness, or relevance for a particular purpose of the information available from or contained within this or any other information products. The User's correspondence, transactions or other dealings with any Third Party available through New Millennium inc. are between the User and such Third Party. We do not monitor the correspondence between any Third Parties and Users and shall have no liability in relation to any dispute which the User may have with any Third Party. We do not endorse and are not responsible or liable for any content, advertising, products or other materials regarding or available from Third Parties. This document does not provide information on accounts that trade gold or forex options or futures. The content of this document is in no way a solicitation to invest in or buy/sell securities.
